

A NEW WORLD OF CLOUD COMMUNICATION FOR THE GROWING BUSINESS

If your business has outgrown its aging voice and data systems then it's time to replace them with a unified communication system that's hosted and maintained in the cloud.

GREAT REASONS TO SWITCH TO CLOUD COMMUNICATIONS

LOWER THE TOTAL COST OF OWNERSHIP

All-inclusive monthly pricing means that you'll only pay for what you use. Phone bills can be reduced by as much as

80%

UNIFY BUSINESS COMMUNICATIONS

One or more feature rich cloud communications solutions can be unified under a common system that can be used from anywhere in the world.

ONE GLOBAL OFFICE

Distance workers, satellite offices and staff on the road can make calls, HD video and instant messaging from anywhere in world using the same internal systems.

LESS RESPONSIBILITY

Continuity of service becomes the responsibility of the provider.

INCREASED PRODUCTIVITY

Less downtime equals more productivity!

ALL SOLUTIONS ARE FULLY SCALABLE

Add/remove staff members, groups and locations as and when required.

ENABLE BYOD AND MOBILE DEVICE INTEGRATION

Freedom and flexibility for your mobile workforce. Use your internal numbers from a mobile device.

LESS DOWNTIME

Most cloud-based communication services have an uptime guarantee of

99.9%

WHAT SOLUTIONS ARE AVAILABLE FROM THE CLOUD?

HOSTED IP TELEPHONY SOLUTIONS

A fully featured telephony service delivered

KEEP YOUR EXISTING NUMBERS

You can keep all of your existing internal and mobile numbers. Use your internal phone number and take internal calls when on the move.

ENJOY ALL-INCLUSIVE FEATURES

Unlike traditional VoIP systems, hosted telephony solutions are packed full of features that you can use out of the box at no extra cost.

REDUCE COMPLEXITY

Costly & complicated on premise PBX hardware is replaced with an unfussy cloud solution that can be managed from any device.

ELIMINATE PBX CAPITAL COSTS

Significantly less investment in hardware and ongoing maintenance is required.

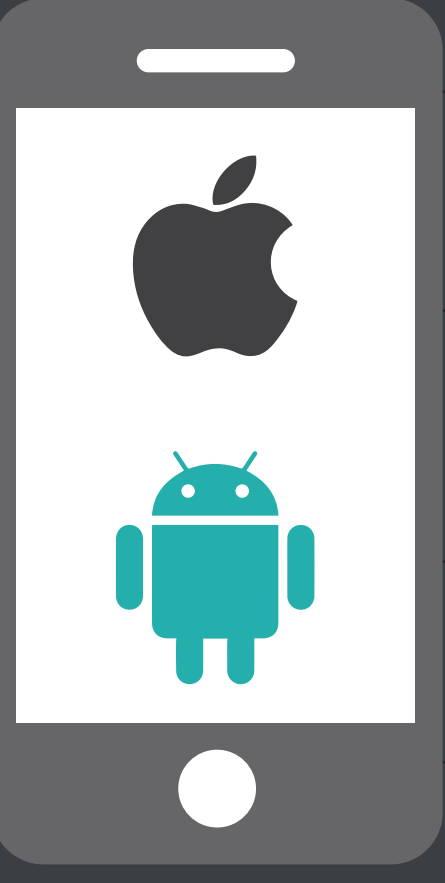

ACCESS REAL-TIME ANALYTICS

Cloud-based call analytics that provide you with the information required to drive service performance.

MOBILE COMMUNICATIONS

Hosted IP Telephony clients for iOS and Android smartphones allow our staff to take their office extension with them when they are on the road.

FEATURE RICH

Android and iOS users get to enjoy the same Hosted telephony features when using a dedicated mobile client.

SECURE CONNECTIVITY

Safe and secure connectivity is possible thanks to the integrated VPN tunnel, which is configured automatically when you install the mobile client.

ZERO LICENCING COSTS

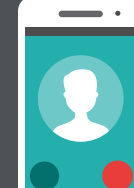

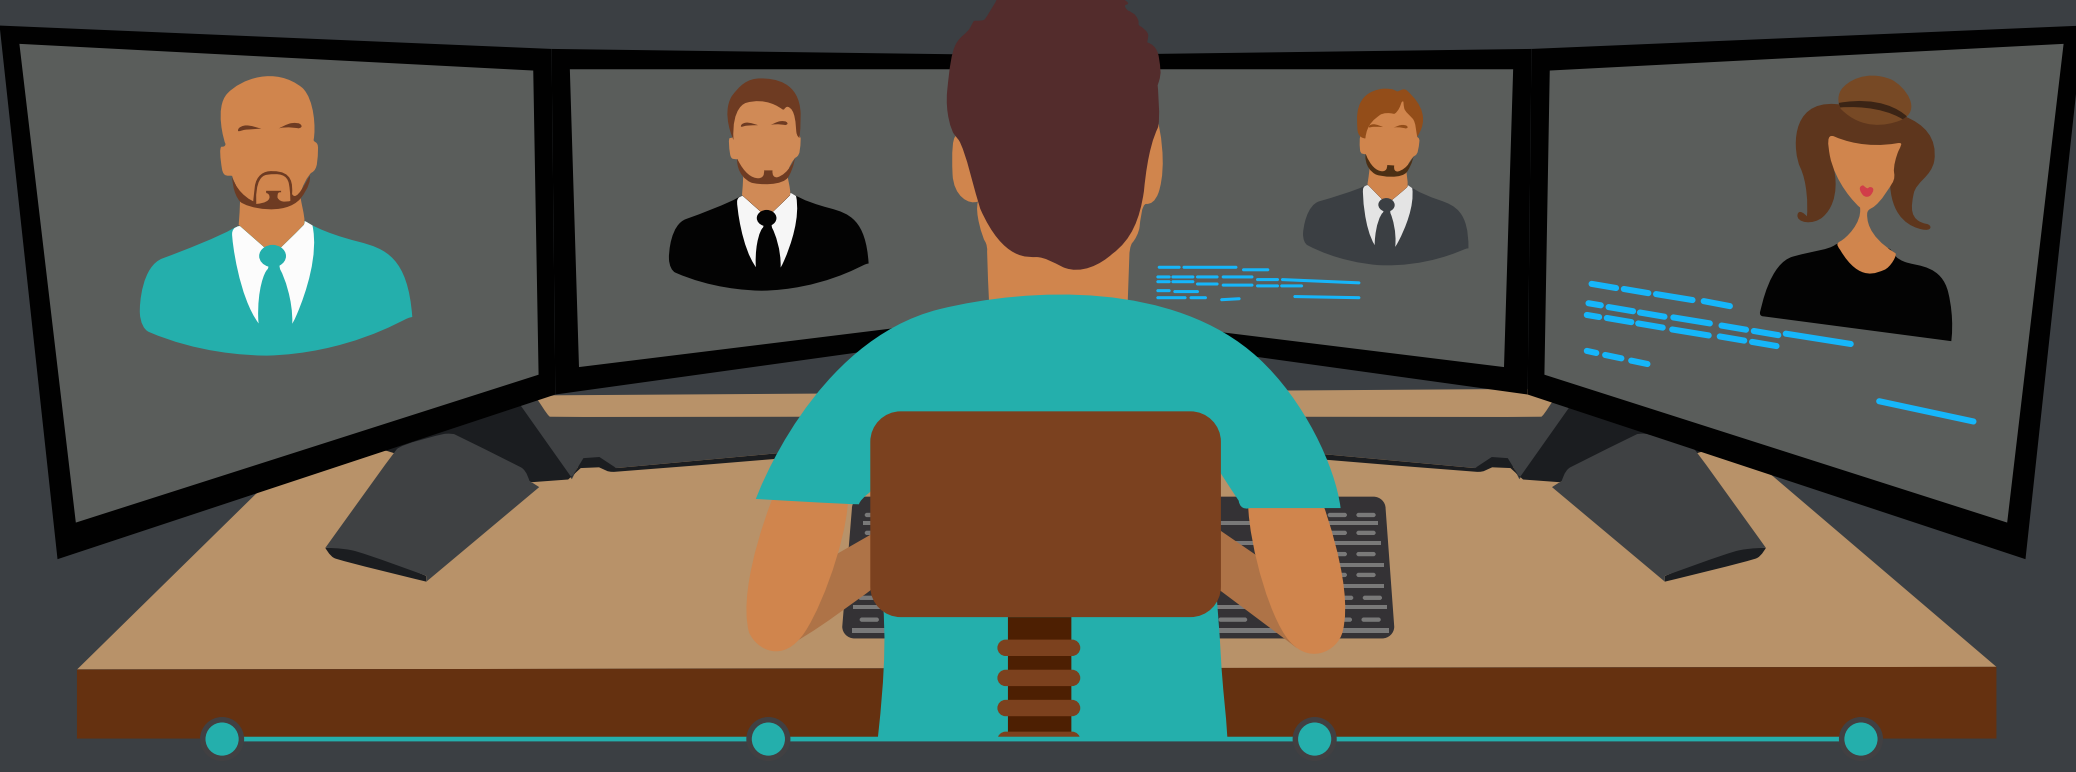

Experience the same cloud telephony features from your mobile device at no extra cost.

NO CONFIGURATION REQUIRED

Only a one-time installation of a native smartphone app is required.

HD VIDEO MEETINGS, MESSAGING & CONFERENCING

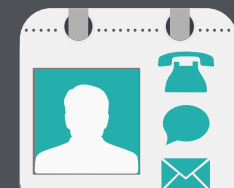

HIGH QUALITY CONFERENCING

High definition, high quality video conferencing directly from the cloud, including support for 4k (ultra HD).

CROSS PLATFORM COMPATIBLE

Conference calls can be made seamlessly between Windows, Mac, Linux desktop and mobile devices.

INTEGRATED DIRECTORY

Skype for business for example is fully integrated with Outlook, allowing you to dial by name within an integrated directory.

HOST MEETINGS WITH UP TO 10,000 PEOPLE

Perfect for marketing, training and lead generation.

INSTANT AND IN-APP MESSAGING

Skype for Business incorporates instant messaging (IM) which is an efficient way for you to connect to individuals and groups.

FAST AND EFFICIENT DOCUMENTED COMMUNICATION

Contact your staff and colleagues directly without waiting on email responses or voicemail messages.

IN APP CONVERSATIONS

Start conversations within Microsoft apps such as Microsoft Word and PowerPoint.

SCREEN SHARING

And group screen sharing functionality.

DRAG AND DROP

Add videos, images and files into a conversation.

EMAIL ALERTS

Send a copy of a message to your inbox when you're not using the messaging service.

Skype for Business is included with Office 365 for business, or it can be purchased as a standalone product.

SAVE MONEY AND IMPROVE BUSINESS EFFICIENCY WITH CLOUD COMMUNICATIONS

There's many advantages to moving to all-inclusive cloud-based communications solution. Messaging, telephony, conferencing and sharing can all be unified in a common platform that's feature rich and significantly cheaper than maintaining all of these platforms on premise. It's time for you be out with the old and get in with the cloud!
