

MEET THE GAME CHANGER!

The World's First Truly Autonomous Drone That Gives You A First - Hand Flying Experience!

HEAD-TRACKER GOGGLES

Get high above the ground without ever leaving it!

⊗ "Birds-eye" view

⊗ Head-tracker sensor that tracks your head movements

⊗ Head-tracker transmitter that transmits signals to the drone via dedicated channel

⊗ Video is live streamed from the drone camera to the two internal HD LCD screens inside the goggles

⊗ Front view camera

⊗ Switch between the drone camera and the goggles on the fly

⊗ Head-tracker gimbal that holds your camera and repeats your head movements

⊗ Gimbal movement limited to 55 degrees in each direction to avoid disorientation

WEARABLE WRIST REMOTE CONTROL

It looks like a watch, it feels like a watch, and it controls your flying drone!

Intuitive controls

Light and adjustable, your hand are always free

1.8 inch screen with anti-glare glass

Dedicated "Hold Position" button

Dedicated "Takeoff" button

Dedicated "Photo" and "Video" buttons

First real wearable remote control on the market

Dedicated "Return Home & Land" button

HELIDECK

One part storage system and one part landing platform, the Helideck is truly one of a kind.

⊗ Two external USB ports for charging other devices

⊗ Easy to store, charge, carry

⊗ Autonomous battery swapping

⊗ Contains 2 extra batteries for a drone and 1 general power source battery

⊗ Autonomous takeoff and landing

⊗ Can be installed on a car roof

FLYBi IS UP IN THE CLOUD

SHOOT

Take photos or video using your Wearable Wrist Remote Control or using the Goggles

Photos and videos are automatically saved to the drones internal storage

Pack your FLYBi and go home!

UPLOAD

FLYBi connects automatically to your home Wi-Fi

Your aerial photos and videos are uploaded to a dedicated cloud server

Your digital memories are safe and secure

DOWNLOAD & SHARE

Find your aerial photos and videos in your dedicated cloud

Modify your photos and videos in the cloud or download them to your PC or Dropbox

Share on social media directly from the cloud!

ANYONE CAN BE A PROFESSIONAL DRONE PILOT

ACCESSIBLE

We set out to make drone flying accessible to everyone, which is why so many of the more difficult features—landing, takeoffs, battery changes, hovering—have been automated. We want everyone to enjoy the FLYBi!

SAFETY AND SECURITY

If the drone loses signal, runs out of battery, or flies too far away, it will automatically return to the Helideck for safe keeping. You can also locate your drone using GPS. Obstacle avoidance system and propeller protectors will secure the drone from crashing.

PRE-PROGRAMMABLE FLIGHT MODES

Really want to take a selfie but don't want to be controlling the drone in the photos? Just fly around and set the scenes, then press the "repeat" button and the drone will repeat the path and shoot scenes that you set before. The drone can be also set to repeat the path several times or until you turn it off. FLYBi will return to the landing station when it's done.

UNLIMITED FLIGHT TIME

The Helideck stores three batteries so your FLYBi never runs out of power! And because the FLYBi automatically changes its own batteries, you can fly your drone as much and as often as you want with little to no downtime!

INTEGRATED FLYING

This one-of-a-kind RC is like no other. Take photos and videos at the touch of a button, and use the FPV goggles to navigate! When using the goggles you'll steer much easier and more effectively than ever before. Only when take the goggles off will you steer using traditional RC controls. The manual will show you how to tackle both steering mechanisms.

CONSTANT "FOLLOW ME" MODE

Set the drone to follow you for continuous video production. If it runs out of batteries, the FLYBi will return to the Helideck, swap out batteries, then return to you to continue shooting video!

THERE'S A FLYBi FOR EVERYONE!

FIRST HAND FLYING EXPERIENCE
HEADTRACKER GOGGLES WITH BUILT-IN CAMERA

GREAT PICTURE QUALITY
1080P HD VIDEO | 12 MP

HANDS FREE
ALL YOU EXPECT FROM REGULAR RC. NOW ON YOUR WRIST.

LITTLE TO NO DOWNTIME
THE DRONE SWAPS BATTERIES AUTOMATICALLY

SAFETY FIRST
THICK DURABLE PROTECTORS COMBINED WITH OBSTACLE AVOIDANCE

TRULY AUTONOMOUS BUT STILL FUN
TAKEOFFS, LANDINGS, BATTERY CHANGES, HOVERING - ALL AUTOMATED

INDIEGOGO. END OF SUMMER 2015. SEE YOU THERE!
