

YOUR SEASONAL GUIDE TO

LAWN CARE & MANAGEMENT FOR EVERY SEASON

Lawn care, like many other home maintenance tasks, calls for proper preparation and planning if you're to have an enviable lawn throughout the year.

For the best results, you need to use different approaches for different seasons depending on the prevailing weather conditions. Here we explain everything you need to know about taking good care of your lawn and keeping it in tip-top condition during the four seasons of the year.

MOWING TIPS

A common mistake is mowing your lawn too short. It weakens the foundation. And as mentioned before, lawns cut at higher heights grow deeper roots. Remember the One-Third Rule: never cut your grass more than a 1/3 inch for each mow. If your grass is particularly long—such as 6 inches—then mow 4 inches. Afterwards, wait a couple days and mow it to 2 inches.
