

# What is ?

## Applied Behavior Analysis

Applied Behavioral Analysis (ABA) is an evidence-based science that focuses on how environment affects behavior. It strives to help individuals make socially significant changes that lead to lifelong outcomes.

Evidence-based approach to learning and behavior for children of all ages.

ABA is covered by most major insurance plans

ABA programs are individualized based on each child's needs, with varying intensity and hours.

**ABA CAN BE PRACTICED IN A VARIETY OF ENVIRONMENTS**
