

WHAT IS APPLIED BEHAVIOR ANALYSIS?

Applied Behavior Analysis (ABA) is an evidence-based science that focuses on how the environment affects behavior. It strives to help children make socially significant changes that lead to lifelong outcomes.

ABA is covered by most major insurance plans.

ABA programs are individualized based on each child's needs, with varying intensity & hours.

ABA is the medically necessary treatment for children of all ages diagnosed with Autism Spectrum Disorders.

ABA relies on data.

ABA can be provided in a variety of environments including:

HOME

SCHOOL

COMMUNITY

ABA CENTERS
