

DEVIL WEB 2.0 BLOG NETWORK SERVICE

Web 2.0 Blog Network

is still very effective way to boost your rankings and diversify your backlink profile. It has plenty of advantages not everyone is aware of. It's fully customizable and easy to develop. When done correctly, it gives you backlinks that are relevant and topic related which is very important in today's SEO. What's more, it's much cheaper than PBN made of aged domains. You don't need to host your sites, there is no registration fees and the list of benefits goes on and on.

If you'd like to experience the power of well made Web 2.0 Network and get some great backlinks to your money sites then here's a service that offers all you need.

You receive Web 2.0 Blogs manually created on highest quality platforms. We choose only the best platforms according to our rule "quality over quantity". Each blog has relevant, human written posts, each 400 words, with images and videos related to your niche. On your request we may also include links to authority sites.

This isn't the common Web 2.0 service where you get some 1 post blogs with spun content that will get deleted before you'll ever notice any serp movements. Every blog is manually created, all the default stuff is removed and customized.

The content is highly relevant to your niche making the backlinks really powerful. We experienced that if you want to get ranked high in Google then your primary focus should be on quality of your Tier 1 links.

Since the blogs will be created by humans and filled out with human written content, there are close to zero chance that they will get removed which is common to automatically created networks with spun articles. The longer they last, the more valuable backlinks they offer.

By default we don't add any links to your website as we recommend to do it later. We experienced that it's good to give these blogs some time to gain authority and trust in Google's eyes. If this strategy doesn't suit your needs then there is a place in the order form where you can add URLs and anchors. We just want to ensure strong customer satisfaction and fulfill your requirements.

Web 2.0 Network is really powerful asset when used correctly and may provide you with great backlinks that are highly relevant and not spammy.

You can make your Network even more powerful by building some High Quality backlinks to it. This helps to give your blogs some more relevance and extra link power.

What's more, you may use it to buffer SAFE links, GSA SER Campaigns or any other link building tactic that could be risky when used directly to your money site.

Frequently Asked Questions

Q What will I get?

A Web 2.0 Blog Network fully dedicated to your needs & highly related to your niche.

Q Do you send reports?

A Yes, you will receive spreadsheet with blogs and login details.

Q What is the content quality?

A We offer only English, well researched, human written content. We don't use any software for content creation.

Q Is there any chance that blogs get deleted?

A The chance are close to zero as we submit only quality content with relevant images and videos, always making sure the blogs look legit. However we can't guarantee anything since we don't own the properties.

Q What is the payment method?

A Paypal is the only payment method we accept.

Q What is your refund policy?

A If we fail to provide the report according to TAT we will fully refund your money.
