

Which means your stress is now physical. It's controlling how you think, how your body and brain function, how creative you can be, how quickly your brain can react to a given situation.  $\mbox{ In "fight or flight", stress is literally limiting what you're capable of achieving.$ So that big presentation you need to ace to get that big promotion and raise at work? It may not go so well if your stress level is that high. That to do list that you want to power through...now you're stressed, not thinking as clearly, making poor decisions and things seem to take forever. When you're under chronic stress, as most of us are when we're concerned about our money situation or our careers, you're never able to think with your full brain, or use the full power of your problem-solving abilities, or your memory. So ask yourself this question ... "Am I dealing with any stress right now?"

You're probably saying "haha...of course I am! Who isn't?!"

#### So if you're living with regular stress in your life it's likely preventing you from being able to think clearly, make good decisions and move towards reaching your financial goals...

Think about your everyday life...

If you could eliminate all of the stress that you're dealing with or at least significantly reduce it, how much better would you feel and how much easier would it be to be able to reach your goals? Tapping has been scientifically proven to reduce stress. Which means that when you **use Tapping to lower your stress levels** you're able to take back control of your body and brain so that you can use it for what you WANT to use it for (like creating your financial freedom)...and not have it controlling you!

#### The Stress Test Study That Shocked the Researchers...

A study performed by Dr. Dawson Church, PhD and Dr. David Feinstein, PhD, measured cortisol levels before and after treatment. 83 participants were divided into 3 groups: the 1st group received an hour of Tapping; the 2nd group received an hour of psychotherapy ("talk" therapy); the 3rd group (control group) received no treatment. The researchers measured cortisol levels before and after the treatment. Cortisol was measured because it is known as the "stress hormone" of the body. As stress goes up, cortisol levels go up.

#### When the researchers were measuring the cortisol levels of the Tapping group after treatment they thought they had a problem...

The levels had dropped so significantly in such a **short period of time** that they thought there must be something wrong with their equipment. They kept recalibrating their equipment and retesting until they finally came to the conclusion that there was in fact...nothing wrong with their equipment but rather that...the Tapping worked! Results: The 1st group (Tapping) **demonstrated a 24% decrease in cortisol levels**; the 2nd and 3rd groups showed no change in cortisol levels. The reality: Psychotherapy alone relieves stress, but over a long period of time. The immediate benefits of psychotherapy don't register in your body, where excessive amounts of the "stress hormone" cortisol still run rampant, putting your health at risk. Study findings: Tapping balances activity between the sympathetic and parasympathetic regions of your brain, producing "a neutral emotional state," the gold standard of health and wellness.

#### How Tapping Can Change Your Financial Reality...

Whenever I talk to people about using Tapping to improve their finances, their initial response always tends to be something like "What does Tapping have to do with making more money?" They assume that if they wanted to learn how to make more money they'd take some type of course that taught techniques like how to invest in the stock market, or in real estate, or land your dream job, or how to run your own business. And while those things can be helpful, for most people they completely miss the boat and don't help them in any way. Learning all of those techniques is useless if you have underlying issues going on that prevent you from succeeding. Tapping changes all of that though...

## What Exactly is "Tapping"... Tapping, otherwise known as EFT or Emotional Freedom Techniques, is a combination of Ancient Chinese Acupressure and Modern Psychology. It was developed originally by Roger Callahan in the 1880's and modified and expanded upon by Gary Craig, Since then, thousands of psychologists, psychiatrists, doctors, coaches and individual users have adopted this powerful technique for use on themselves, their clients, family members and more. This simple technique literally involves "tapping" on This simple technique inerally involves tapping of the meridian points of our body while saying certain statements. EFT has been known to work for years by psychologists, therapists, coaches and everyday people. In recent years a major push has been made for more evidence based research and the certain to be accurate a local statements. results have been astounding!

Clinical research studies with EFT are proving impressive results in a variety of areas such as relief from chronic pain, emotional problems, addictions, phobias, post traumatic stress disorder, athletic performance, PTSD, & among other things... yes...amazing results with financial success! Check out this short video to see what experts are saying about the effectiveness of Tapping...

to explain what this program is not This is NOT a program where we're going to just focus on the positive and expect everything to be better. This is NOT a program that is going to teach you some secret get rich quick technique that's nothing more than an empty promise, you know, like some program that says you'll make more in the first month then you did all of last year. If that's the type of program that you're looking for, then I would suggest not continuing any further. The truth is that **those** programs all miss what's really going on unconsciously that is preventing you from succeeding or growing at the speed that you'd like and they all ignore the stress that is having a neurological effect on your body and brain. This program is for men and women who are ready to finally be able to succeed no matter what they're doing, who are ready to be able to take on any challenge and succeed financially, who are ready to make their lives easier and more enjoyable than ever before. The reality is that there is no magic bullet technique to become successful, happy and wealthy without any effort, yet I've designed this program to make it as easy, enjoyable and effortless as possible.

I'm going to break down what I'll be guiding you through in this unique process in just a minute, but before I do that I want

I've made it so that you don't have to go through the journey of creating your financial success alone wondering if you're making the right decision at every turn.

...we have already changed from being in about 50 to 70 thousand dollars of debt to not being in debt at all." "Nick, Thank you for this awesome opportunity to become a part of your tapping community. We both sat in on most if not all of the 7 weeks of the wealth creation topping and we have already changed from being in about 50 to 70 thousand dollars of debt to not being in debt at all. We are now even growing a savings account which is already at \$13,000.00!

# "When I think back on my journey through the 7 Weeks to Financial Success Program and my progress since I think - WOW!!! Our finances are better than they have been for a long time..."

When I think back on my journey through the 7 Weeks to Financial Success Program and my progress since I think - WOW!!! Our finances are better than they have been for a long time although there is still room for improvement and growth. I had the courage to ask for a specific salary when I was told I was getting a raise - and got it; I've received several unexpected bonuses at work such as one after my boss got back from his overseas holiday; gifts in the form of life coaching and EFT sessions, I've been having small Lotto wins on a regular basis, won a digital camera with Readers Digest and a huge hamper of fresh vegetables from our local supermarket. There have been other benefits too that are probably bigger and more important than the financial ones. I'm in a waaaay better headspace than I was 12 months ago and my relationship with my brother is in a totally different place which is just incredible. I can finally see us becoming best friends. I have also released Xg of excess weight and dropped a dress size. And best of all, I no longer beat myself up all the time. I can honestly eyeball myself in the mirror and say "I love you, I'm proud of you", mean it and know it to be true. I truly am my own best friend. Thank you tapping and Nick and the whole team at The Tapping Solution.

What This Program Consists Of... First off, it's important for you to know that I've designed this program so that you have different options in terms of the level of participation you want to undertake. I know that different people learn differently and want different things, and the last thing I want is for you to feel like there's too much to the program, or too little, or anything like that. So I've designed it in a way so that **you can get results doing it the way you want to do it, while putting in the amount of time that is right for you.** 

These 7 weeks are about taking you through a process using Tapping that covers the most important topics that need to be addressed in order for you to eliminate the things blocking your success (like the stress we talked about). And to create the unconscious patterns that need to be developed so that every decision and action you take on a daily basis is leading you towards exactly what YOU want.
