

# HOW TO BUILD YOUR OWN FISH POND

If you want to discover the true contentment that comes from having your own garden pond then you'll want to ensure that you build the best possible pond, in the best location to provide an ideal environment for your aquatic plants and fish. An environment where your fish and plants will not only grow but truly thrive.

Recently, I released a new digital book called **"How To Build Your Own Fish Pond"** that reveals all the strategies you need to design and build your own fish pond and stock it with fish. This book grew out of my own desire to create a beautiful water garden plus it answers all the questions I was asked by people just like you when they knew I was writing this book.

Imagine being able to relax by your own pond ... perhaps listening to the gentle sound of a waterfall or garden fountain ... displaying your goldfish or koi to your admiring friends ... and adding value to your property and your lifestyle. It's not difficult! This is a simple, straightforward and richly illustrated guide that you can use right now to create your own pond ... no matter whether it's a fish pond, a frog pond, a lily pond or a gentle water feature.

## AT LAST! ALL THE INFORMATION YOU NEED TO BUILD YOUR OWN FISH POND HAS BEEN ASSEMBLED INTO ONE BOOK!

### HERE ARE JUST SOME OF THE THINGS YOU'LL DISCOVER ...

#### DESIGNING YOUR POND

Consider what type of aquatic life you want in the pond - this will determine the depth. Gain an understanding of a pond ecosystem before you start digging!

#### WHERE TO LOCATE YOUR POND

This could be close to your house so you can enjoy sound of a waterfall or it may be at the end of a winding garden path.

#### WHERE NOT TO LOCATE YOUR POND

Tip: don't build it in the lowest part of your garden as it is likely to flood during heavy rain!

#### HOW TO CHOOSE A POND LINER

Our useful calculator will help you determine your pond liner size.

#### BUILDING YOUR POND

You'll learn the step-by-step process - **with illustrations** - from digging, to installing the liner to filling the pond and adding plants.

#### FILTRATION

Discover the difference between mechanical and biological filtration. This section includes complete instructions - **with illustrations** - for setting up a biological (vegi) filter.

#### CLEANING THE FILTER

This is where you'll discover the benefits of a bio-filter!

#### PUMPS AND PLUMBING

How to choose the correctly sized pump for your pond and how to set it up.

#### HOW TO BUILD A WATERFALL

A waterfall can become the focal point of any water garden and building one is easier than you think.

#### WATERFALL DESIGN

Avoid the most common mistake ... a waterfall should be built in proportion to the pond! This section is well illustrated to help you choose your design.

#### ALGAE CONTROL

How to deal with algae and achieve the correct biological balance..

#### AVOIDING AMMONIA PROBLEMS

Sometimes ammonia becomes a problem in new ponds before the biofilter has become established.

#### CHLORINE AND CHLORAMINE

If you have fish in your pond you will need to use a dechlorinator chemical if you fill your pond from a water supply containing chlorine.

#### NITRATES AND NITRITES

Discover the difference and find out if they are harmful to your pond or fish.

## DON'T MISS OUT ON THIS COLLECTION OF EVERYTHING YOU NEED TO BUILD YOUR OWN FISH POND

**CLICK HERE FOR OUR VERY SPECIAL OFFER**

## AND THAT'S JUST A TASTE OF WHAT IS COVERED. HERE'S WHAT ELSE YOU'LL DISCOVER ...

✓ **Adding plants to your pond.** We'll show you the difference between marginals, deep-water, floaters and oxygenators, and you'll discover how and where to plant them.

✓ **Storm warnings for ponds.** A well designed pond will survive a big storm and a long power outage. A pond overstocked with fish will deteriorate quickly during a prolonged power outage.

✓ **Seasonal pond care.** Step-by-step instructions to maintain your pond in peak condition through the seasons.

✓ **De-icers.** We explain how they work and help you decide if you need one.

✓ **Introducing fish to your pond.** How many fish can you put in your new pond?

✓ **Adding new fish to an existing pond population,** and what to look for when purchasing new fish.

✓ **Which fish to choose for your pond.** Goldfish are extremely hardy and are often a good first choice for the new pond or water gardener.

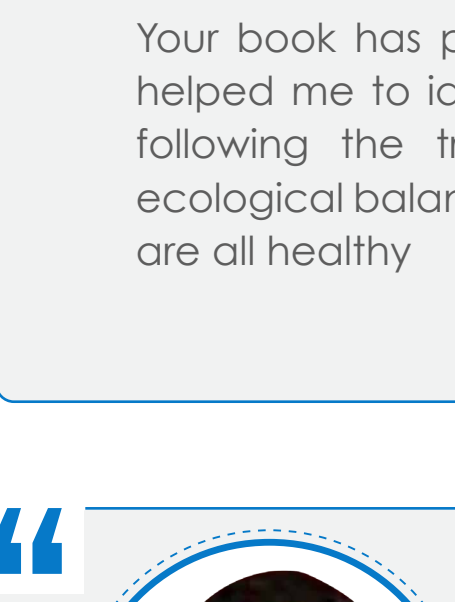

✓ **Types of goldfish.** We list most of the common varieties and include many pictures.

✓ **Caring for your goldfish.** How to take care of your goldfish - from babies to adults.

✓ **Goldfish health.** How to keep your fish healthy and in peak condition.

✓ **Goldfish diseases.** What to do when your fish are sick.

✓ **Goldfish anatomy.** Apart from exaggerated characteristics bred into the more fancy varieties, goldfish conform to the anatomical structure found in other fish.

I was delighted to read such a well prepared book on ponds and water gardens. The book touches on all aspects of pond and water garden construction with excellent instructions and illustrations to help the beginner and to increase the knowledge of those already with a pond.

The section on introducing fish to the pond plus the ongoing care of the fish will be a valuable addition to the knowledge of any hobbyist. This book will help all water gardeners get more enjoyment from their pond and add confidence to their fish-keeping.

A great book that has answered so many questions I had about building my own pond.

I now have a wonderful pond in my garden that includes a waterfall and is stocked with goldfish. It is bringing a great deal of pleasure to me and my family. Your book is easy to read and has so much information on constructing your own pond that I believe anyone can do it if they follow your instructions. The well-illustrated section on filtration was especially helpful.

By the way, you were right - downloading your e-book was easy!

I'd lost several fish from my pond over a short period without being able to identify the cause.

Your book has proved to be an invaluable resource and it helped me to identify the cause of disease in my fish. After following the treatment advice you recommended the ecological balance in my pond has been restored and my fish are all healthy

## READ WHAT OTHERS HAVE TO SAY ABOUT HOW TO BUILD YOUR OWN FISH POND

## BUILD YOUR OWN FISH POND OR WATER GARDEN NOW!
