

# FROM LOCK-DOWN TO ACCESS:

## HOW SECURITY CAN ENABLE GREATER MOBILITY ACROSS THE ENTERPRISE

The opportunity enterprise mobility presents should not be encumbered by fear of data breaches.

The mobile security market will grow to **\$7.5. Billion by 2020**

The right mobile security technology can increase access to applications and drive workplace flexibility

By 2017, 75% of mobile breaches will be caused by application misconfiguration

With low-cost devices and millions of apps available to all, having the appropriate controls in place **is a must for any business.**

### Get the right security controls

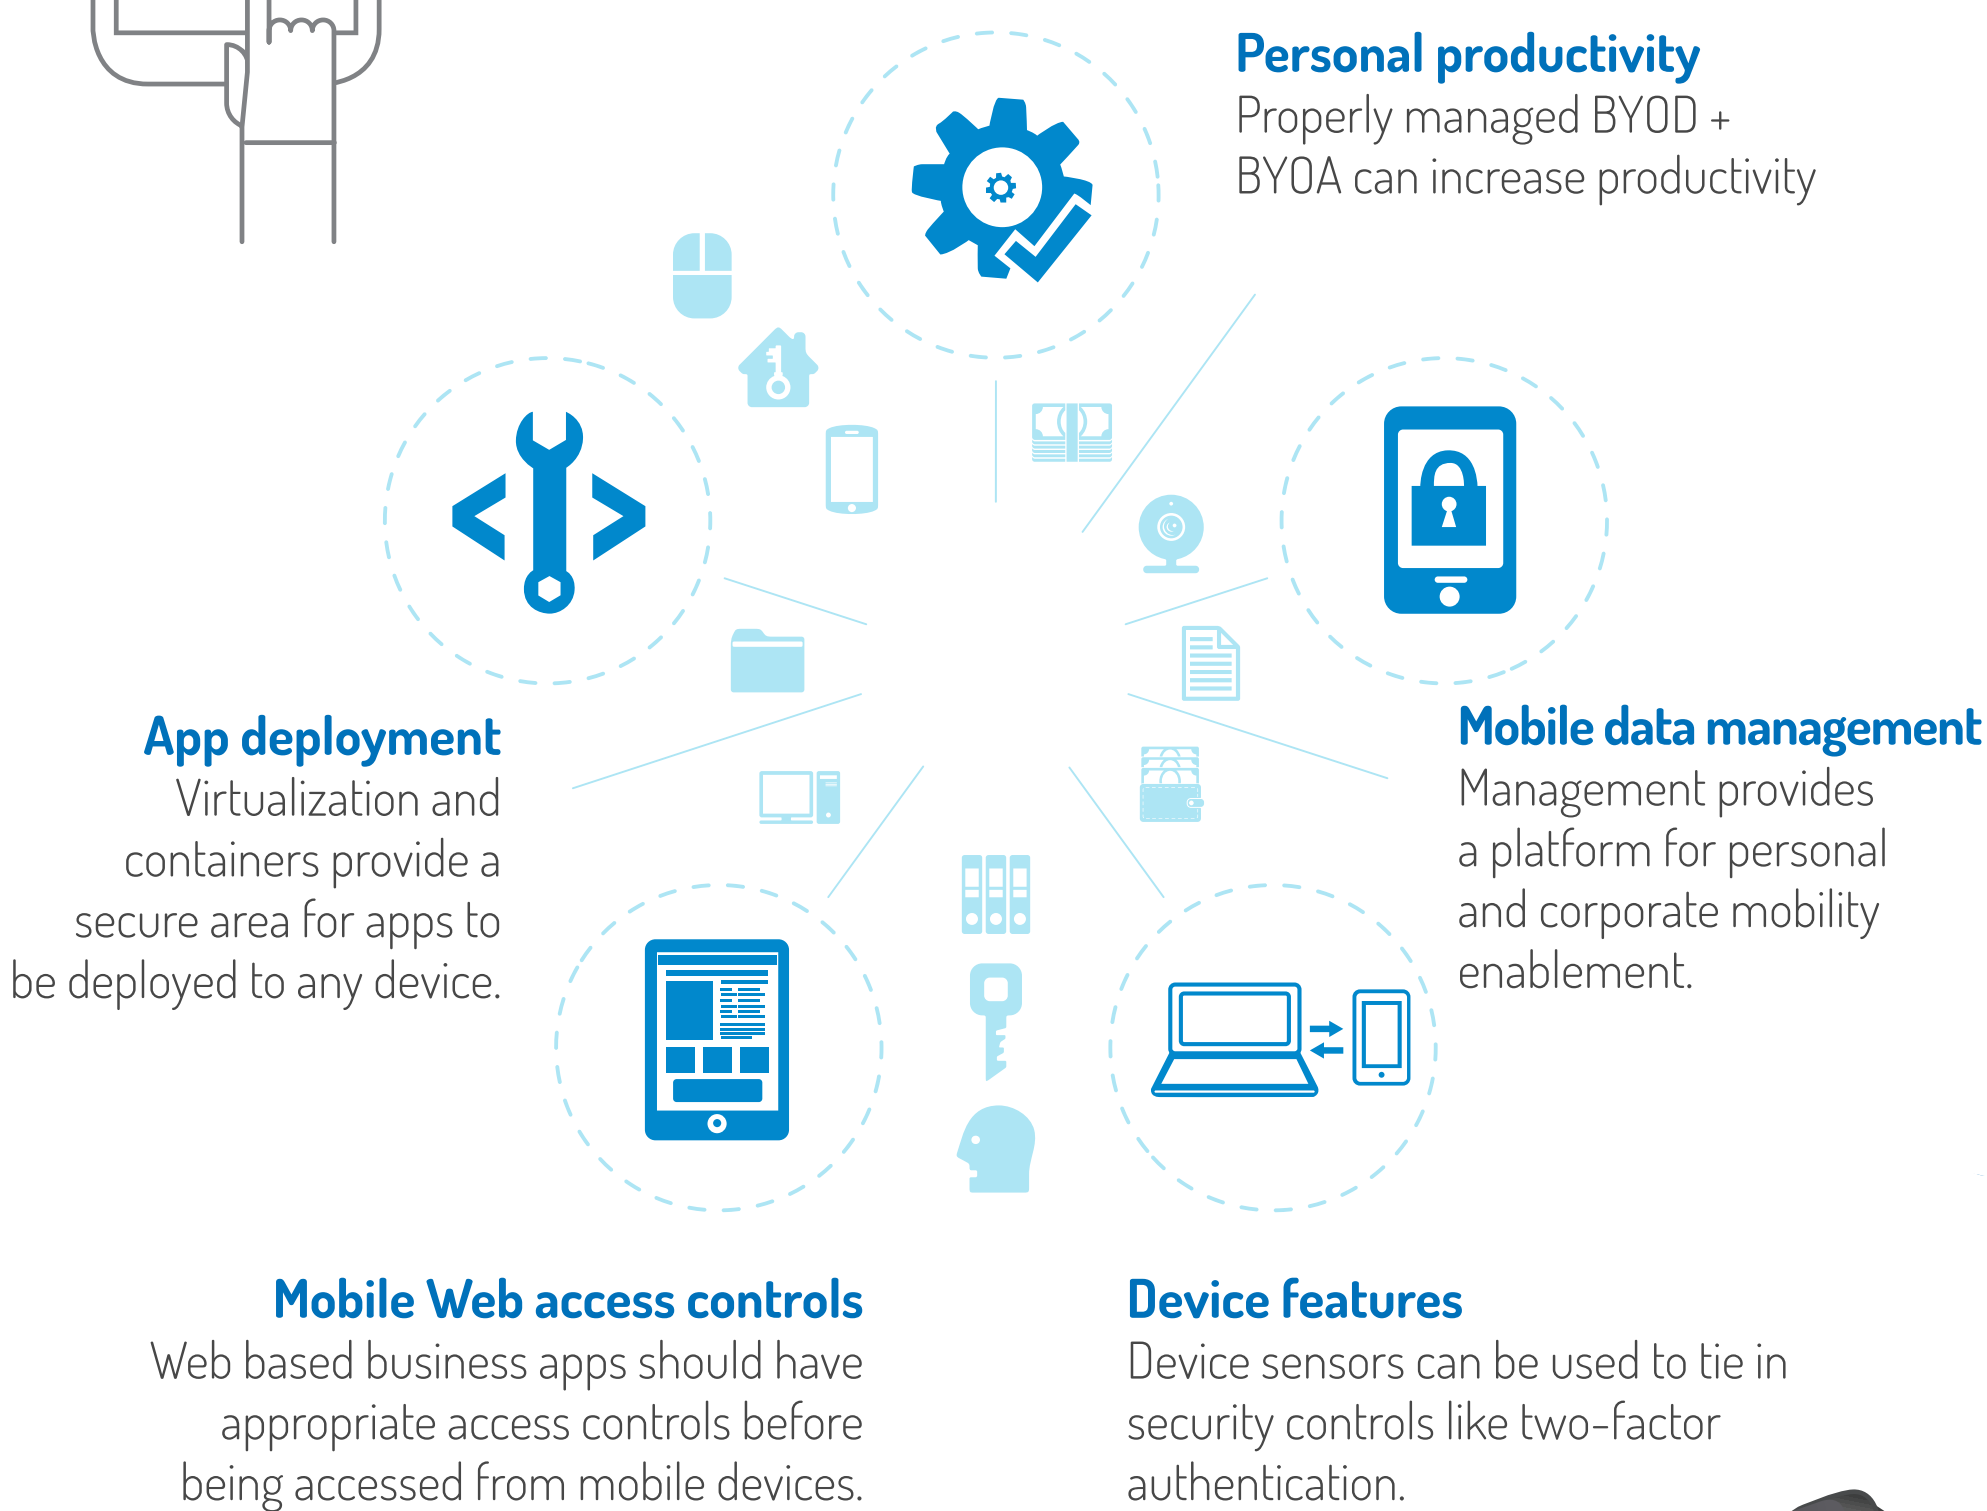

you can confidently develop or deploy a mobile application to any device and boost workforce productivity with the right security controls. Without them you can only restrict access and hinder usage.

BYOD mobile devices accounted for **22.5%** of ALL consumer smartphones shipped in 2013.

Enterprises across Asia must focus on mobile app and data management to provide an appropriate level of security amid the sea of handsets. This approach lays the foundation for security as a mobility enabler.

## HOW SECURITY BECOMES A MOBILE ENABLER

Securing apps on personal devices enables workers to be productive on their favoured devices AND protects the information being accessed.

**Mobility has much to offer enterprise productivity and is at the forefront of bridging the IT and physical security worlds. Strong mobile security is the enabler that will give your business the confidence to embrace the opportunity.**
