

WHY ARE PEN VAPORIZERS SO POPULAR?

Vape pens have become a hit and they rule the vaporizing world. For some reason, people love them, even though they might not offer the strongest and purest flavors. Yes, we must also admit, vape pens are really cool, portable and discreet. Here's why people love them so much.

THEY ARE SUPER PORTABLE

LIGHTWEIGHT BODY

you can carry them anywhere

SLEEK DESIGN

they can pass for a plus-sized pen

DISCREET

they can pass for a plus-sized pen

VAPOR STRENGTH AND QUALITY

They can deliver great results

- Get used to your own rhythm of pressing the power button.
- Draw the vapor slower for a more intense flavor.
- Find the perfect quantity of herbs to place inside.

**A HOTTER COIL MEANS DENSER VAPORS.
CAREFUL NOT TO OVERHEAT!**

HOW DO THEY WORK?

- They use the conduction method to heat up materials.
- The heating coil is at the center so the herbs are heated equally.
- A filter sets the distance between the heating coil and the herbs.

Portable and desktop vaporizers use a different principle: convection

GOOD BATTERY

Vape pens use Lithium-ion batteries. They are rechargeable and last up to three hours.

EASY TO USE AND SIMPLE

Vape pens have three pieces that you need to screw together:

1 The heating chamber

2 The mouthpiece

3 The battery

Add herbs and power up the heating element by pressing the button.

- Give it time. It takes a while to get the right timing and draw. Once you do, you'll love it.
- **For cleaning:** clean the insides with a Q-tip or a swab of cotton drenched in rubbing alcohol.
- Don't touch the coil, though.

HOW TO CHOOSE THE PERFECT

VAPE PEN?

Choose according to the preferred use and functionality:

G-PEN best delivers with oils.

T1, STOK & CLOUD PEN best for oils and waxes

ATMOS R2 AND G PRO

For herbs, oil and wax. Very popular, excellent form & build. High-quality body. Needs a separate oil attachment for liquids.

CHOOSE BASED ON DESIGN

- Some are discreet while other come with glass globes for denser vapors.
- Low profile designed vape pens are less powerful.
- Larger vape pens have offer a more powerful punch.
